

## Activities and Achievements out with School

It is not only what your child learns in school that counts. Children's activities and achievements out of school such as attendance at clubs, success in sport, music or personal wider interests will be celebrated at our weekly assemblies.

Parents can help by encouraging their child to let the teacher know of any activity they have been involved in at home and in the wider community.

## Personal Learning Planning

Information for Parents

*Working together for Success and Achievement*

## Aim

We aim to encourage the children to take greater responsibility for their own learning and choices they make.

We aim to help all children become

- Successful Learners
- Confident Individuals
- Responsible Citizens
- Effective Contributors

## **What are we doing?**

To help to achieve these aims we will develop the skills children need to help them:-

- understand what they are learning and why
- talk about their learning
- make progress in their learning
- have confidence in themselves
- set personal goals and recognise their own achievements
- learn in school, at home and beyond
- enjoy their learning
- celebrate their learning

## Programme of Personal Learning Planning

### Targets

At the beginning of each term targets will be set with the children. A copy will be made and put in the child's homework pack so parents are aware of the targets set and as a reminder for the children.

The targets will be evaluated by the child and teacher at the end of term. A copy will be sent home to parents

### Learning Logs

Children will be involved in reflecting on their learning through talking to the teachers. They will record something about their learning on a learning log building up a picture of their successes, what they have learned and enjoyed in school.

### Achievement Folders

Children will build up their personal learning throughout their time at Tippet Primary in a personal folder. This will be shared with parents.

### Profiles

In the upper stages the children will use IT to record their successes and achievements on 'One Note' through GLOW.
